Greenwood Drive Reconstruction

About the project

The Township of Wilmot has awarded Sousa Concrete the contract for reconstruction work for Greenwood Drive to replace watermain, stormwater and sanitary infrastructure. As part of this project, sidewalk will be installed on one side of the road.

Construction is anticipated to start on May 11, 2023

Work is expected to start May 11th and it is anticipated the work will be complete on/or about September 15, 2023.

Access During Construction

During construction the contractor will endeavor to maintain access to driveways and residences throughout the project. It is noted that at times this access may be restricted. The contractor and our team will ensure there is communication related to temporary driveway access restrictions.

Proposed Sidewalk

To comply with the requirements of the Accessibility for Ontarians with Disabilities Act (AODA), sidewalks are required on all new and re-built roads within the Township where active transportation is to be encouraged. The sidewalk placement has been chosen due to grading constraints and to facilitate pedestrian access to the park.

Municipal Services

The Township will work with the contractor to ensure municipal services are maintained including ensure garbage pick-up and domestic water. There will be temporary disconnects of water which will be communicated in writing a minimum of 48 hours prior to disconnect. This is to allow for existing services to be connected to the temporary watermain, and again to be reconnected to the new watermain when the new infrastructure is commissioned. For garbage and recycling, if Regional Garbage collection cannot be accommodated on the Street the Contractor shall collect garbage containers and place them at Huron Street. Please ensure that your house number is clearly indicated on all recycling and garbage containers.

This information is available in accessible formats upon request

Pre-Condition Survey of Structures

As part of the project, the Contractor will be scheduling a Pre-Construction Survey of all residences within the project limits. This preconstruction survey assists the contractor and homeowners if there are impacts due to the construction activities.

Additional Communications

As part of this project there will be additional communications provided by the contractor and the Township. We request that you review these documents, and if there are any questions or concerns regarding them, reach out to Township Staff or the Contractor to help us resolve any concerns. An inspector will be on-site from the Township throughout the project or you can contact the Contract Administrator for construction related questions.

For more information

For more information about the project, or if you require this document to be provided in an alternative format as per the Accessibility for Ontarians with Disabilities Act (2005), please contact:
