Project

Victoria Street between Highway 7 & 8 and Boullee Street and Boullee Street between Victoria Street and Hamilton Road

Welcome to this Public Information Centre presentation, organized by the Township of Wilmot, Infrastructure Services.

This project is being managed and coordinated by the Township of Wilmot and funded through sewer and water reserves, and there is no direct cost to the homeowner.

The purpose of this presentation is:

- To provide an opportunity for the public and property owners to review design details.
- To present existing and proposed conditions drawings, and streetscape concepts within the project limits.
- To provide a forum for comments by the public and property owners, which may be taken into account in the final design for the project.

All members of the public and property owners are invited to:

- Review the online documentation.
- Consult with the project team members.
- Review the displays depicting the existing and proposed project details and discuss any design issues or impacts on you community and/or property.

Victoria Street and Boullee Street

- Reconstruct the roadway, install new curb and gutter, replace watermain, storm sewer and sanitary sewer and private services to property line
- Introduction of the new curb and gutter. The roadway width will be widened from its current existing width of 7.0m-8.0m +/- to the new consistent roadway width of 8.0 metres.
- A new 3.0m wide asphalt multi-use path on the west side of Victoria Street and the north side of Boullee Street from Riverside Drive to Hamilton Road
- New 1.5m Wide concrete sidewalk
 - On the west side of Victoria Street from Riverside Drive to 372 Victoria Street.
 - On the east side of Victoria Street and the south side of Boullee Street from Riverside Drive to Hamilton Road.
- Driveway aprons will be replaced with concrete aprons.
- New on-street parking bays will be installed along the north side of Boullee Street.
- Some boulevard trees will need to be removed to install the new underground services; however, replacement trees will be planted where space permits.
- A new 450mm diameter Regional transmission trunk watermain.

Please refer to the drawings to view the design for these improvements.
