

What you will need

- Pool noodle
- Inflatable swim rings
- Backyard pool

Directions

1. Parent or adult toss the rings. The children are the floaters.
2. Have the floater(s) get in the pool and sit on the pool noodle so that one end of the noodle rises up in the air. This protruding end of the pool noodle is the ring toss target.
3. Tell the floaters to turn themselves and their pool noodles so that their backs are to the pool deck.
4. The adults toss the rings and try to catch them on the pool noodle
5. See how many rings you can catch.

Note: This can be adapted to a land game by using another stick-like object (e.g. hockey stick or baseball bat) and a homemade ring.
